Yes

What information would you like to share?

Student Government appears to be facing challenges in effectively utilizing student fee dollars within the grant process. The existing grant guidelines appear to be overly complex. Organizations like mine are often confused and negatively impacted by current education surrounding the grant process and guidelines. These rules need significant clarification. We are requesting that Student Government establish clear parameters and guidelines to ensure that groups understand when it is permissible to receive SGA funding and recognize all the ways in which these funds can be applied. The current process does not have transparency or fairness, which is a must if they want to better serve the interests of the students and organizations.
